

Registering Online

To register online, first go to our Home Page at Gracefuldanceacademy.com. On the top, there will be a tab that says "Registration." If you are a new student, click the "New Student" button. From there, it will ask you to create your profile. Once you are logged into your Parent Portal, scroll down to where all of the icons are created and click, "Register for Classes."

Please keep in mind that we filter our classes based on your child's age, so if they have special permission to register for a class outside of the age limitations, please change their birthday to accommodate what's set for the class. You can change their birthday back once they are registered.

If you have not registered your child into our system yet, there is a black button at the top of the page that says "Add Student." Once you select the class you'd like to register for, your information is saved but you are not enrolled in the class. **Please add your auto payment information and pay for your child's first month's tuition plus their one-time registration fee.** To enroll in autopay, click the button at the top of the registration page that says "Click here to register for autopay" then enter your information in. **IMPORTANT** - Once you've added your bank or credit card information, go back to the "Register for Classes" tab and continue the process. There should be a green button at the top that says "Finish Registration Now." That will bring you to a page that will charge you for your \$35 registration fee and the first month's class payment. Once that payment is finalized, you are in the class!
