

## How do I switch my child to a different class?

If you would like to drop a current class and change to a different one, start by logging into your parent portal then click "Account" and scroll down to "students." You should see a list of your student(s) and the classes they are enrolled in. Click the name of the class that they are registered for and select "drop this class." Your child is then removed from the class.

After, head back into "Account" then "Register for Class" and pick the class you would like to register for. Follow the same process you had before making sure to complete all of the forms and adding your payment method. Once you have paid for the new class, your child is enrolled!
